

TFIW2018

The Thin Films Workshop on Interdisciplinary Technologies (TFIW2018) was successfully convened during 1-4 June, 2018, at Kashgar, Xinjiang, China. The workshop was jointly organized by the Thin Films Society (TFS), Shandong University, Southwest University and Kashgar University, and hosted by the Kashgar University. The workshop was chaired by Prof. Sam Zhang, President of TFS, and some 70 participants from China, Australia, Singapore and Taiwan region attended the workshop. At the workshop, 4 keynotes and 25 invited speakers presented their recent research works in the areas of thin films, laser, spectroscopy, atomic/molecular and optical physics, as well as the related interdisciplinary researches on thin films technologies. The workshop participants were also invited to visit the campus of Karshgar University and to take the opportunity to have a dialogue session with the leaders of the Schools of Physics and Electrical Engineering, Chemical and Environmental Engineering, Civil Engineering, led by Prof. Erkin Umer, President of Karshgar University.
